

## Global warming

### Worksheet A

1. The earth's climate has been constantly changing.
2. In the last century the temperature has risen very fast, about 1.2 to 1.5 F degrees.
3. The temperature change is due to the natural causes.
4. Greenhouse gases trap the heat near the earth causing greenhouse effect.
5. Greenhouse gases – carbon dioxide and methane have now reached the highest level in the past 420 000 years.
6. Arctic sea ice is shrinking.
7. It has declined about 20 % in the last 30 years.
8. Researchers predict that the temperature will rise about 2-10 F degrees by the end of the century.
9. Weather patterns will not change due to global warming.
10. Some species may become extinct.
